

BUILDING INTEGRATED MANAGEMENT SYSTEMS

BOTEZATU, C.P.; CARUTASU, G. & BOTEZATU, C.

Abstract: *Changes in everyday life of companies affect decision making process, every success business story having an efficient management system. Decision making is based on large volume of data, from various departments of company or from outside, reflecting different various periods of time, structure or owner. From these considerations, we present a structure of such system with specific issues encountered on design and development, based on research study case which is on course. So, in order, are presented general considerations, specific requirements regarding DSS, basic Romanian ground research, project IMS and a set of conclusions.*

Key words: *DSS, KMS, management, information system, management*
