

INCREASING OF COMPETITIVENESS IN EAST EUROPEAN COUNTRIES BY COMPUTER AIDED PROCESS PLANNING

MONKA, P. & MONKOVA, K.

Abstract: *The process planning activities are significant means for flexibility, time to market and competitive advantage of enterprise. The process planning systems are therefore important tools for increasing of efficiency and profit.*

In many East European countries is needful for application of modern processes at time of Product & Manufacturing Design. When designing the new product the aim is to secure or increase its technical value not only by systematization of the production process but also by increasing the level of the supporting tools for the rational processing of the production documentation and data needed for planning.

Key words: *Computer Aid, Process Plan, Process Planning, Information System*
