

RELATIONAL DATABASE SYSTEMS SUPPORT FOR PRODUCTS DEVELOPMENT PROCESS AT THE ENTERPRISE LEVEL USING OPEN SOURCE SOFTWARE

ROSU, S.M.; DRAGOI, G.; GURAN, M. & ROSU, L.

Abstract: *Open source software with free sources is a good option these products having a remarkable quality because of fact then often these projects get together distinguished programmers and everything is public, open and anybody can come. Very well it's than management team to know from the beginning what are the costs (human and material) and how much will be during the project. Generally, to realize and to implement a database project are requisite a period within few months and few years. Certainly, in the actual market the price makes the rules. Enterprise software solution is influence by shrift, medium or long-term calculation. Decision can be take consequence a comparative analysis.*

Key words: *enterprise, relational database, middleware, open souce software, client - server architecture.*
