

# REMOTE MONITORING OF PARAMETERS FOR A PRESSURE TRANSDUCER THROUGH HART PROTOCOL AND LABVIEW ENVIRONMENT

RANCEA, I.; SGARCIU , V. & STAMATESCU, G.

**Abstract:** *In this paper we used the concepts of remote control for automated monitoring of parameters for a pressure transducer with sensitive piezoresistive element. The application can monitor the parameters of different industrial processes using the same server. Our case study is using a transducer provided by Siemens – SITRANS P, MS series, 7MF4013 equipped with a HART modem.*

**Key words:** *transducer, HART, remote monitoring, LabView*
