

TRAINING NEED FOR BUSINESS CREATION IN AUTOMATION FIELD

IZVERCIANU, M.; MOCAN, M. & POPA, H.

Abstract: *Human Resources training regarding the entrepreneurship must start in universities and continue with training over the entire professional life. The purpose of our research is to detect the knowledge gaps of the undergraduate IT students in technical Universities in the area of business creation, during their university education. The research methodologies were: phenomenological group analysis and questionnaires.*

The target group was formed of senior students in automation, Master's degree students, and graduates from 20 SME's This research allows the outlining of a profile in business creation area for students with background in automation field.

Key words: *Need, human resources, training, students, graduates*
